EDUCATION

St. Louis Community College, AAS, Programming - 2020

Webster University, BS, Computer Science - Enrolled 2021

Lewis & Clark Career Center, Computer Info Systems - 2011

PROJECT EXPERIENCE

Japanese Flashcard App — Responsive Web Development

- Designed UI using Bootstrap 4
- Built upon Vue.js using HTML and JavaScript
- Created a backend database using Apache (PHP) and MySQL
- User-customizable UI that aims to make the studying process intuitive and painless

Contact Management App — Full Stack Web Application

- Designed UI using Bootstrap 4
- Contributed to the UI, JavaScript, and Database of this Java MVC application.
- Implements Ajax and the Google Maps API for geolocation of contacts within the application
- This winning team project was selected to be implemented at a local ministry during a course on Agile development

WORK EXPERIENCE

Medical Equipment Technician — Agiliti, St. Louis

May 20201 – Present

- I provide equipment inspection, maintenance, calibration, and repair service on medical devices.
- I complete all paperwork and data entry accurately to ensure complete documentation.

Delivery Driver — Pickleman's, St. Louis

Aug 2018 – May 2021

- As a driver I dispatched orders and delivered them to our hungry customers.
- I developed my customer service skills while taking orders inside the store. Efficiency, adaptability, and accuracy were central to my high-paced job. Taking orders, bagging orders, and dispatching orders required a strong attention to detail at every step.
- I was tasked with training any new hire drivers with daily tasks and I provided them with strategies for dispatching and driving routes.
